

CALEBKEVIN DURAI

Mobile:91-877-8693676

Email:calebkevindurai@gmail.com

Objective:

I intend to establish myself as Software Engineer with an integrated business solution provider through a long time commitment, contributing to the company's growth and in turn ensuring personal growth within the organization. I believe that my technical, functional and communication skills will enable me in facing the challenging career ahead.

Professional Snapshot:

- **11+ years** of professional experience in Java/J2EE&AndroidTechnologies.
- 8+ years of development Experience in Android Development.
- 3+ years of development Experience in Flutter Development
- 2.5+years of development Experience in Java/J2EE.
- 2+years of development Experience in Kotlin
- Commitment, hardworking, can grasp things quickly and think strategically.
- Highly dedicated to produce professional work with highest quality and creativity.

Professional Experience:

- Worked as Java &Android Developer in **Claro Soft Solutions**, Chennai from March 2013 to July2014
- Worked as Java &Android Developer in **Aadhityaa Info media Solutions**, Chennai from August 2014 to April 2016
- Worked as Android & Java Developer in **GRMC Technology Solutions Pvt Ltd**,Chennai from April 2016 to October2019
- Worked as Senior Android Developer in **iGrid Consulting Solution Pvt Ltd**,Chennai from Nov 2019-Jan 2020 to 30th January2020
- Worked as Consultant Android Developer in **eNoah Solution Pvt Ltd** Chennai From 1st Feb 2020 to 5thJune 2020
- Worked as Senior Software Engineer in **Vega Intelisoft Solution Pvt Ltd** Chennai From 10th July 2020 to 15th Nov 2020
- Working as Consultant Android Developer in **Zilogic System Pvt Ltd** Chennai From 9th March 2021 to 24th December 2021
- Working as Senior Software Developer in **EdgeWorkz Business Solutions Chennai** From 10th Jan 2022 to 30th April 2024

Educational Qualification:

- **Bachelor of Computer Science (2001-2004)** from Jaya Arts & Science College with an aggregate of **6.1**
- **Master of Computer Application (M.C.A) Computer Science(2004-2007)** from Jaya Engineering College with an aggregate of **6.5**

Technical Expertise:**Android Technical Stuff:**

Language	: Android, Flutter, React Native, Java
Android Tool	: Android Development Tool. Android Studio, Android ADB, Google Maps
Patterns	: MVC, MVP, MVVM, Databinding, Viewbinding
Database	: SqlLite, Sharedpref, Room
Networking	: Socket, AsyncnTask, Handler, Retrofit, Volley
Web Service	: Restfulservice, JsonService, GsonService

Android HAL Stuff:

Embedded	: Bluetooth, WI-Fi, Barcode, NFC, RFID, BLE
Sensor	: Heartbeat, NFC, RFID, Door Contact,
Board	: Pic Controller, Node MCU,

Java Technical Stuff:

Languages	: Java, J2EE
FrameWork	: Struts 1.2, MVC, Hibernate. SwingComponent
DBSoftware	: MSSQL Server 2000, MySQL 5.0, Postgres 9.3, Mongo DB,SqlLite
Web Servers	: Jakarta Apache Tomcat 8.0, Jetty Server
J2EETechnologies	: JDBC, Servlets,JSP
WebTechnologies	: HTML, JavaScript. Ajax, Query
WebService	: Restful Service, Service Platform
Networking	: Socket Programming [desktop and android]
IDE	: Eclipse Luna, Neon, Kepler Net Beans6.9.1
Embedded& Sensor	: Java Serial Communication, HearBeat, NFC, RFID, and Contact
Operating System	: Windows XP, Windows 7

Project: 1

Project : **Food Order Management [OMS]**
Client : **IntHub**
Team Size : 1
Role : **Mobile Developer**
Duration : **August ' 2023– April 2024**

Tools & Technologies : **Android Studio, Flutter SDK**

Description:

In this Application we have developed a Food Order Management App ,where Order Manager can Login and select the Business and Food Trucks ,Order Manager can add the Menus to the Food Truck and delete the product from the Menu, We can able to Check out the list of Items .

Project: 2

Project : **Fresh Mandi App**
Client : **IntHub**
Team Size : 1
Role : **Mobile Developer**
Duration : **Nov' 2022– July 2023**

Tools & Technologies : **Android Studio, Flutter SDK**

Description:

In this Application we have developed a Fresh Vegetables and Fruits App ,where users can Login and set the Location to see the List of Delivery Location ,We can add the Product to the cart and delete the product from the cart, We can able to Check out the list of product .

Project: 3

Project : **Car Sales App**
Client : **IntHub**
Team Size : 1
Role : **Mobile Developer**
Duration : **Jan 2022– Oct 2022**

Tools & Technologies : **Android Studio, Flutter SDK**

Description:

In this Application we have developed a Car Sales App ,where users can Login and set the Location to see the List car Warehouse City ,We can Sell the Car and Buy Car.

Project: 4

Project : **Usb Picture & Video [Mahindara SUV 700 Infotainment]**
Client : **Mahindara**
Team Size : 5
Role : **Mobile Developer**
Duration : **March 2021 – Dec 2021**

Tools & Technologies : **Android Studio.**

Description:

In this Application we have developed a Usb Picture and Video In SUV Car 700 ,where users Select the List of Picture from usb and display on the infotainment . .

Project: 5

Project : **Drop2Basket [E-Shopping**
Client : **Us Client**
Team Size : **1**
Role : **Android Developer**
Duration : **Nov' 2020– Feb 2021**

Tools & Technologies : **Android Studio.**

Description:

In this Application we have developed a E-Shopping App ,where users can Login and set the Location Code to see the List of Product ,We can add the Product to the cart and delete the product from the cart, We can able to Check out the list of product .

Project: 6

Project : **Plan Vs Actual**
Client : **Renault Nissan Automobile India Pvt Ltd**
Team Size : **1**
Role : **Android Developer**
Duration : **July' 2020– Spec' 2020**

Tools & Technologies : **Android Studio**

Description:

In this Project we have developed an app to Show the work finished in the different section in the Car Manufacturing unit, In this every 1 minutes a update will hit the serve to show the total number Car finished From the target and show the pending car by marking red and this layout will change the timing based on the shifts.

Project: 7

Project : **Health Care**
Client : **Renault Nissan Automobile India Pvt Ltd**
Team Size : **2**
Role : **Java Web Developer[JSP/Servlet]**
Duration : **Spec' 2020– Nov' 2020**

Tools & Technologies : **IDE mars,, JSP,Servlet,JQuery,MS-SQLServer**

Description:

In this Project we have developed an web application ,where Renault Nissan has its own Health Care Center inside plant so if any employee got sick or not feeling well can reach the Health care center and check with doctor ,our application show list of employee went to the Health Care Center for that user have enter the patient details in the application it can be view by the Managers and this Web application will also show the Covid-19 Patient Details and Dashboard show the total Healthy employee, Diseased employee in a month, year and day

Project: 8

Project : **Service Operation Monitor**
Client : **Daimler**
Team Size : **2**
Role : **Developer**
Duration : **April' 2020– May' 2020**

Tools & Technologies : **Visual Studio Node Js,ReactNative.**

Description:

In this Application we have developed to use this component to monitor asynchronous service operations and view information about service operation instances, publication contracts and subscription contracts. View runtime performance statistics for asynchronous and synchronous transactions that flow through the messaging system. View statistics in numeric or graphical format.

Project: 9

Project : **Truck Tracking Using Mobile**
Client : **Reliance Transport**
Team Size : **3**
Role : **Android Developer**
Duration : **Nov' 2019 – March'2020**
Tools & Technologies : **Android-Studio, Android Development Tool, Jdk1.8, Google Map.**

Description:

In this Application we have developed by Mobile GPS for tracking truck, and we can able to track the route of the driver on the Google map instantly. It gives the update of the location based on the fixed times. The main thing Safety Measure Module are coded and Accident and Dangerous Prone zone alerts are developed.

Project: 10

Project : **Smart Trolley**
Client : **Linkay Technology Solution Pvt Ltd**
Team Size : **4**
Role : **Android/Java**
Duration : **5 Month [Nov 2018 -May2019]**
Embedded : **UHF RFID Reader**
Tools & Technologies : **Jdk1.8, MySQL5.0, Eclipse Luna, Android Studio 3.0**

Description:

The hardware is based on Arduino, UHF RFID Reader Module, RFID Card and Buzzer .It eliminates the traditional scanning of products at the counter and in turn speeds up the entire process of shopping, also with this system the customer shall know the total amount to be paid and hence can accordingly plan his shopping only buying the essential commodities resulting in enhanced savings. Since the entire process of billing is automated it reduces the possibility of human error substantially.

Project: 11

Project : **Home Security Alert**
Client : **RR Technology Solutions (OPC) Private Limited**
Team Size : **2**
Role : **Android Developer**
Duration : **2 Month [Spec' 2018 – Oct' 2018]**
Embedded : **Node MCU, Door Contact Sensor, Camera, Wi-Fi Module, CPP
NVR, CPP Camera**
Tools & Technologies : **Android Studio, Jdk1.8**

Description:

In this Project we created an Android Application to Communicate with Node MCU through WiFi Module using Android. In this Status of Door Contact Sensor and Motion Sense can be Known the user by Sending Code to Node MCU through Android, and user will get the Status in Mobile as Notification. Control Done by Android Application 1.Enable/Disable the Both Door Sensor and Motion Sensor.2.Motion Detect Send Alert to User Mobile 3.Door Open or Closed Alert Send to User Mobile.4.Live Camera Streaming

Project: 12

Project : **Home Automation System**
Client : **Aeva Private Limited**
Team Size : **4**
Role : **Android Developer**
Duration : **Jan' 2017 – March' 2017**
Tools & Technologies : **Android Studio, Jdk1.8,**

Description:

In this Application we write socket programming for the Microcontroller and relays with Wi-Fi device and Bluetooth Device, through android we send the different format of data to function the electronic device like ON/OFF and this project consist of Scheduling timing for the devices to ON/OFF

Project: 13

Project : **Evolve Clothing RFID Inventory Management**
Client : **Evolve Clothing Private Limited**
Team Size : 4
Role : **Java Developer**
Duration : **Nov' 2016 – Dec'2016**
Tools & Technologies : Swing Frame, Jdk1.6, MySQL5.0, MSSQLSERVER with Eclipse Luna, COM Port serial Programming for Micro Controller and Can Protocol Reader and writer

Description:

Reading RFID data from the Database and Writing to the RFID and validating the length of the RFID, Reading the RFID tag and Validating the Data and Replying the signal for the Duplication Tag. Java Application to send the RFID through the Can protocol the 3 Receiver and Validating the Duplication in each Receiver.

Project: 14

Project : **BIM [Building Information Modeling]**
Client : **GRMC Product**
Team Size : 3
Role : **Java**
Duration : **September' 2016 – October'2016**
Tools & Technologies : Jdk1.8, Apache Tomcat 8.0, Servlet2.4, JSP2.0 and MySQL5.0, Neon With Eclipse 3.5.1, Jetty Server, Bootstrap, JQuery.

Description:

In this application All building in a city is Render in the Web as 3D view, by importing the Ifc file into the bim server, where we can query, schedule and stimulate the building as per the different user created in the bim server and the client can get the real time update of his building and Work done can be render in the real time 3D view. And the properties of all the object inside the building.

Project: 15

Project	: Web Point Cloud Viewer
Client	: LinkayTechnology
Team Size	: 4
Role	: Team Lead /Java Web Developer
Duration	: April' 2017 – August' 2017
Reference Tool	: Potree,Plas.io
Tools &Technologies	: Servlet, Jsp, Sqlite3,Jdk1.8, JavaScript and JQuery

Description:

In this Application **Web Point Cloud Viewer** is a POC application for viewing point clouds that enables user to upload, store and preview point cloud data. Using Web Point Cloud Viewer is integrated with the output format of 3D scanning processes. is now widely used in AEC, Manufacturing and Engineering. Nevertheless, a limited number of applications allow users to process point cloud data online, as well as support collaboration options. It enables users to simply and securely store processed point clouds, as well as convert 3D files to PDF and share large complex models.

Project: 16

Project	: Truck Tracking Using EmbeddedGPS
Client	: LinkayTechnology
Team Size	: 2
Role	: Android Developer
Duration	: Jan' 2017 – March'2017
Tools &Technologies	: Android-SDM-Manager, Android Development Tool, Jdk1.6, Apache Tomcat 6.0, Servlet2.4, JSP2.0 and MySQL5.0 With Eclipse 3.5.1.MongoDB, Google Map.

Description:

In this Application we have developed by both Embedded GPS and Mobile GPS, this application is used to create a login for the driver in web and android, and we can able to track the route of the driver on the Google map instantly. It gives the update of the location based on the fixed times.

Personal Details:

Father’s Name :Durai
DateofBirth : 29stNov,1983
Marital Status :Married
Nationality : Indian
Languages Known : English Tamil
Address : No: 21, Anthony Nagar 3rd Main StreetThiruninravur
Chennai-602024

Declaration:

I solemnly declare that all the above information is correct to the best of my knowledge and belief.
