SUMMARY

Flutter Developer with experience in developing cross-platform mobile applications using Flutter and Dart. Skilled in building responsive and high-performance Android and iOS applications and integrating RESTful APIs. Experienced in GetX, Provider, clean and reusable code, and MVC/MVVM architecture. Strong in debugging, troubleshooting, testing, and performance optimization. Passionate about learning modern Flutter technologies and developing user-friendly mobile applications.

EXPERIENCE

Bluebase Software Service Pvt.Ltd

Chennai

May 2025 - Present

Flutter Developer with experience in developing cross-platform mobile applications using Flutter and Dart. Worked on the BBVision HRMS application with features such as attendance, leave, claims, payslips, and task management. Experienced in REST API integration with PHP/MySQL backend services and GetX state management. Skilled in developing responsive UI, reusable components, debugging, and performance optimization. Familiar with MVC, MVVM, and Clean Architecture for building scalable and maintainable applications.

PROJECTS

BBVision

HRMS Mobile Application

Apr 2026 - Aug 2026, Chennai

Developed an HRMS mobile application using Flutter to manage employee attendance, leave, claims, visitor details, payslips, and project/task assignments. Integrated RESTful APIs with a PHP/MySQL backend to fetch, update, and display application data. Implemented GetX for state management and developed responsive, reusable UI components. Worked on project assignment, task tracking, API integration, debugging, and performance optimization to improve application reliability and user experience.

Music Player Application – Flutter

Developed a cross-platform music player application using Flutter and Dart with both online streaming and offline music playback support. Implemented audio playback features such as play, pause, next, previous, background playback, and event-based playlists using just_audio. Used GetX for state management, navigation, and dependency injection, along with local storage and media access for offline functionality.

Personal Diary Application – Flutter & Firebase

Developed a production-ready Personal Diary application using Flutter, Dart, and Firebase with Clean Architecture. Implemented Firebase Authentication, Cloud Firestore, and Firebase Storage for secure authentication, real-time data synchronization, and media management. Used Provider for state management, navigation, and dependency injection.

SKILLS

Languages: Dart, PHP

Mobile Development: Flutter, Android & iOS Development, Cross-Platform App Development, Responsive UI, Custom Widgets, Animations, Gesture Handling, Widget Tree Optimization, Firebase

State Management: GetX, Provider

Backend & APIs: RESTful API Integration, HTTP Networking, JSON Parsing & Handling, PHP, MySQL

Architecture & Design: MVC, MVVM, Clean Architecture, Reusable Widget Design, Modular Code Structure

Tools & Platforms: Android Studio, VS Code, Git, GitHub, Postman
