Address.

94B/4D,1st street JJ nagar,
Puthugrammam,
Kovilpatti-628501

My Education

2016-2017

SSLC

John Bosco Matric Hr Sec
School,Kovilpatti

Aggregate:89.8

2018-2019

HSC

John Bosco Matric Hr Sec
School,Kovilpatti

Aggregate:79.17

2019-2023

BE Computer Science

Kamaraj College Of Engineering
And Technology,Viruthunagar

CGPA : 8.18 upto 7th Semester

My Skills

Cyber Security

Computer Networks

Kali Linux

Programming - C , Python

Security information and event
management (SIEM)

Domain of Interest

Cybersecurity & Networking

Achivements And Certification

- Cisco Certified Network Associate(CCNA)
- CISA Online Course Certification
- IBM Cybersecurity Certification on Coursera
- Skillrack C and Python Programming Certification
- Splunk certifications
- Awarded Cybersecurity AWS Badge
- Awarded RPA Diploma Certificate and Badge
- Winner of IITB-AICTE Mapathon 2022

Projects

DDoS Attack Simulation and Detection

The purpose of this project is to develop an machine learning model to classify possible DDoS attacks in an SDN environment. For the simulation of the network Mininet was used. A Real-time Dataset is created by simulating DDoS attack. The System uses both real-time and CAIDA's DDoS Attack 2007 dataset in order to train the algorithm and classify DDoS Attacks . SVM classification algorithm is used in order get an accuracy of 99.68%.

Internship

Completed Cyber security internship in Cisco

Completed Cloud security internship in Cisco

Personal Details

Date Of Birth : 03-04-2002
Gender : Male
Nationality : Indian
Father's Name : Manivannan S
Languages Known : English , Tamil

Soft Skills

Leadership

Intelligent Video Surveillance

In this project we are mainly stressing on the features of intelligent surveillance which are monitoring feature, noise detection and face identification. This can be achieved by integrating camera with python computer vision algorithms.

Encryption And Decryption Tool

In this project, users have to enter the message to encode or decode. Users have to choose encrypt or decrypt option to encoding and decoding process. The same key must be used to process the encoding and decoding for the same message. It was created by using tkinter and base64 modules in python.

Keylogger

Keylogger is a program in which we monitor keystrokes. These keystrokes will be stored in a log file. And also send keystrokes via email. The pynput and smtplib library are used to achieve this.

Declaration

I hereby declare that the information provided above is true to the best of my knowledge.
